

Metal Forming and Stamping

- *Steel, Stainless Steel, Phosphor Bronze, Aluminum*
- *Custom design capabilities*
- *Quick turnaround*
- *Just-in-Time production and shipping*

Your Custom Part Is Our Specialty

APCOM's capability with **high speed metal stampings** serves a broad range of customers, and is used to make a wide variety of components. Our processes utilize **cold rolled steel, brass, stainless steel, spring steel, and phosphor bronze.**

Our **die design and manufacturing capabilities** allow us to also offer **custom stampings**. We have stamping press capabilities including Bruderer (30 ton and 75 ton) high speed stamping presses, and 150 ton Bliss press. Additionally, weldments, flanges, and other components are produced on our Schuler (500 ton and 700 ton) high speed cold forming presses.

Our engineers can provide you with **expedited quotes on custom metal components**. Just send us a blue-print, and we'll respond quickly with full details. You'll find our **prices competitive and stable**. We understand deadlines and JIT requirements, and we can provide **pre-assembly as required**.
